

November 2011

PRODUCT RELEASE ANNOUNCEMENT

Weatherford International Ltd. (NYSE:WFT), continues to expand the application suite for Total Production Management with the release of CygNet Measurement

CygNet Software (a Weatherford International company), announces the release of CygNet Measurement

Houston, Texas: November 2011 – CygNet Software, provider of the leading Enterprise Operations Platform (EOP) for the oil and gas industry, announced the availability of CygNet Measurement. Coinciding with the release of version 8 of the Enterprise Operations Platform, CygNet Measurement is the first measurement system designed to work seamlessly in multiple market segments, for the processing of gas measurement data. As an application designed to operate on the CygNet Enterprise Operations Platform; performance, and seamless integration are guaranteed, thus providing continued growth and return on investment for current Enterprise Operations Platform clients.

Product Announcement

This release, version 8, demonstrates the company's commitment to deliver significant new functionality on a regular basis, which ensures both existing and new clients the functionality through which they can optimize their operations; and continued return on their investment in the Enterprise Operations Platform. The product release is available immediately.

New CygNet Software Support Portal Announcement

In an ongoing commitment to deliver best in class product support, a new Support Portal has been commissioned. Product updates and associated documentation may be accessed. All current users have been configured in the system; please go to <http://support.cynet.com> and retrieve your password via the "Forgotten Password" link.

About CygNet Software (a Weatherford International company)

CygNet Software empowers leading oil and gas companies to increase their operational efficiency, market responsiveness, and regulatory compliance. CygNet's Enterprise Operations Platform (EOP) provides a platform for collecting, managing, and distributing massive amounts of real-time and historical data from field, production, and business systems, giving users at all organizational levels the information they need to support daily operations and make informed strategic decisions. Over 100 companies, representing more than half of North America's domestic gas production and thousands of miles of major gas transmission pipelines, are operating on CygNet today.
